Experience

Oppia Foundation, Google

Remote

FULL STACK SUMMER DEVELOPMENT INTERN

May 2018 - Aug. 2018

- Worked on restructuring Oppia's learning content.
- Strategizing user flow and user interface with the web application and creating backend models and objects for new structures with unit tests.
- Implemented UI mockups with mobile-responsive support with unit and end-to-end testing with Selenium browser.
- *Tools: Google App Engine, AngularJs, Python, Selenium Browser Testing, No SQL Database.*

Hasura

Remote

WINTER INTERN

Oct. 2018 - Present

- Responsible for writing boilerplates in different frameworks.
- Solving Issues related to Hasura's GraphQL Engine.
- *Tools: Hasura's GraphQL Engine, Javascript, Angular 7, Apollo Client*

Education

Indian Institute of Information Technology Allahabad

Uttar Pradesh, India

B.TECH. IN ELECTRONICS AND COMMUNICATION ENGINEERING

2016 - PRESENT

Selected Projects

Portena

IIIT Allahabad

MINI PROJECT

- Lets you communicate even in the absence of cellular networks by sending text messages and making calls by bouncing off signals from your paired node to other nodes within the range of 3kms.
- *LoPy, Sockets, Python*

Slydok

IIIT Allahabad

MINI PROJECT

- Smart conversion of word documents to slides using text summerizer with selective theming. We used multiple text summerizers to get summary of paragraphs and use them to create bullet points and one-line sentences to use in slides.
- *Natural Language Processing, Text Summerizer, XML Parsing, Python*

Lecture Connect

IIIT Allahabad

MINI PROJECT

- Realtime translation of college lectures into any language selected by the user.
- *Web Sockets, NodeJS, Translation API*
